Final EFH Effects Analysis ELDS draft final v27316.docx

Hi Alison,

I hope you are enjoying your summer!

It is that time again, we decided for the administrative record to be consistent with our approach to the consultation approach as discussed the last week of Jun

So, I have sent a letter but again, attaching the "effects analysis" for your review. The letter was signed and sent out early last week .. I did send an extra copy in the mail and will send it via email today.

As discussed before, this is the Effects Analysis for the Eastern site, (this is draft), so please let me know if there is anything you want me to add or change to make your response easier!

EPA has designated Central and Western dredged material disposal sites. This is for the Eastern site (includes part of the existing site New London)..

This is not the LIS DMMP (that was a USACE document)... lots going on in LIS, so let me know if you need to chat again~!

Please review and let me know if you would like any additional details provided or links etc.

Thanks! (I am at 617-918-1536) if you would like to discuss...
